Obs

Helper

link_to_add_association

This function adds a link to your markup that, when clicked, dynamically adds a new **partial** form for the given association.

Helper

link_to_add_association

Note: the javascript behind the generated link relies on the presence of a wrapper class (default **.nested-fields**) to function correctly.

Obs

Parte 5
link_to_add_association

```
link_to_add_association('[Adicionar Novo
Telefone]', f, :phones)
```

Helper

link_to_remove_association

This function will add a link to your markup that, when clicked, dynamically removes the surrounding partial form. This should be placed inside the partial `_<association-object-singular>_fields`.
